PROFESSIONAL SUMMARY

Computer Science graduate and AI/ML engineer focused on applied AI and backend systems. Developed Skillonomy at Toshali Infotech, combining Neo4j knowledge graphs with Milvus RAG to deliver grounded, personalized AI learning experiences. Built a reinforcement-learning controller for multi-zone data-center cooling, a graph-backed fitness agent, and a content-based watch recommender. Strong in Python, FastAPI, retrieval systems, and the infrastructure around production AI.

TECHNICAL SKILLS

Languages: Python, JavaScript, SQL, HTML, CSS
Frameworks & Libraries: FastAPI, Flask, Pandas, PyTorch, LangGraph
Databases & Tools: Neo4j, Milvus, PostgreSQL, Git, Docker, MLflow, AWS, Linux

EXPERIENCE

- Python AI/ML Intern** | Toshali Infotech Pvt. Ltd. – Surat, Gujarat Jan 2026 – Aug 2026
 - Developed Skillonomy, an AI-powered personalized learning chatbot that helps business users learn AI concepts through interactive conversations and generates customized hands-on labs tailored to each user's understanding level.
 - Architected a Neo4j knowledge graph to structure domain-specific AI concepts and their relationships, enabling multi-hop retrieval and reasoning that a flat vector store can't support.
 - Integrated a Milvus vector database to power retrieval-augmented generation (RAG), grounding chatbot responses in source material and cutting hallucinations on out-of-distribution questions.
 - Tech Stack: Python, FastAPI, Neo4j, Milvus, LangGraph, Crawl4AI
- AI Intern** | iLink Digital – Pune, Maharashtra May 2025 – August 2025
 - Developed an Intern Companion Agent using Copilot Studio and an Intern Attendance Portal using Power Apps, seamlessly integrating both for smooth intern operations.
 - Collaborated with senior team members, providing UI design support for Power Apps projects to ensure user-friendly and enhanced experience interfaces.
 - Tech Stack: Python, Git, Power Apps, Copilot Studio
- Web Developer Intern** | Agarwal Creations Fashions Pvt. Ltd. – Pune, Maharashtra June 2024 – August 2024
 - Redesigned the company's e-commerce website on WordPress and integrated cart, wishlist, and inventory management through multiple extensions.
 - Improved website visibility and search ranking through SEO best practices, contributing to increased organic traffic from 130 to 2.5k visitors per month.
 - Designed and built professional portfolios for company internal high-level professionals using HTML and CSS.
 - Tech Stack: WordPress, HTML, CSS, Bootstrap

PROJECTS

- Skillonomy** | AI Learning Platform – Python, FastAPI, Neo4j, Milvus, LangGraph [Video demo](#)
 - Developed an AI-powered learning platform at Toshali Infotech that teaches business users AI concepts through interactive conversations and generates personalized hands-on labs.
 - Combined a Neo4j knowledge graph for multi-hop concept reasoning with Milvus RAG to ground answers in source material.
- Data Center Cooling Optimization using Reinforcement Learning** | Python, Gymnasium, Stable-Baselines3, Matplotlib
 - Designed a custom Gymnasium environment simulating a multi-zone data-center cooling system with realistic thermal dynamics and power-consumption modeling.
 - Trained a Soft Actor-Critic (SAC) agent to control cooling effort in a continuous action space while keeping all zones within target temperature bounds; built evaluation scripts for reproducible analysis.
- IronLog** | Gym Logging PWA – Python, FastAPI, React, PWA
 - Built a mobile-first Progressive Web App for logging gym exercises and tracking workout splits with offline functionality.
 - Developed an intuitive UI for exercises, sets, reps, and rest periods with persistent local storage and sync capabilities.
- ReWatch** | Watch Recommendation System – Python, scikit-learn, pandas, NumPy
 - Developed a content-based recommendation system for wristwatches using structured and unstructured product data.
 - Engineered one-hot, scaling, and TF-IDF features, then used cosine similarity to generate personalized recommendations.

CERTIFICATES

AI Infrastructure and Operations Fundamentals Nvidia	Issued Aug 2025
Neo4j Certified Professional Neo4j	Issued Mar 2026
AI Agents 101: Building AI Agents with MCP AMD	Issued Nov 2025
Machine Learning DeepLearning.AI	Issued Jul 2025

EDUCATION

DY Patil International University B.Tech CSE · 2022 – 2026	7.89 CGPA
Nowrosjee Wadia Science College Jr College · 2020 – 2022	52.20%
SNBP International School High School · 2019 – 2020	82.20%
